

5µm Bacteriostatic Cartridge WFC341

designed to remove rust, sand and scale, this advanced replacement cartridge delivers reliable particle retention while protecting your plumbing and sanitary ware. Infused with bacteriostatic properties, it helps reduce the risk of secondary microbiological contamination by keeping the filtration environment clean. With stable performance and a standard size design, it ensures easy replacement and consistent water quality you can trust.

SIZE	4.5" x 20"
FILTERING RATE	5µm
TEMPERATURE OF WATER	+3...+43 °C
HEIGHT	250 ± 1,0 mm
EXTERNAL DIAMETER	60 ± 1,0 mm
RECOMMENDED FLOW RATE	8 L/min

This replacement cartridge is designed for cold water use only.
Replace every 6 months or sooner if water quality or flow decreases.
Before use, let 10 L of water run through until it comes out clear.
